

Steps to Perfect Your Startup Pitch

Project Number. 2020-3-EL02-KA205-006663

1. Do Your Homework

To do a pitch well, you have to understand your audience," Kawasaki says. "Thank god there's this thing called LinkedIn." Look up everyone in the room and research their background to find points of common interest, such as the fact that you're both amateur hockey players or got rejected from Stanford. But you also want to find where you're not relevant. "If you go into a firm and you meet with a partner who's in charge of semiconductor investing and you are a Snapchat killer, it's just not going to work."

Project Number: 2020-3-EL02-KA205-006663

2. Set the Stage

How long do I have?

What are the three most important things that I can explain?

Can they hold their questions until the end?

WHAT'S INCLUDED IN A

pitch deck presentation?

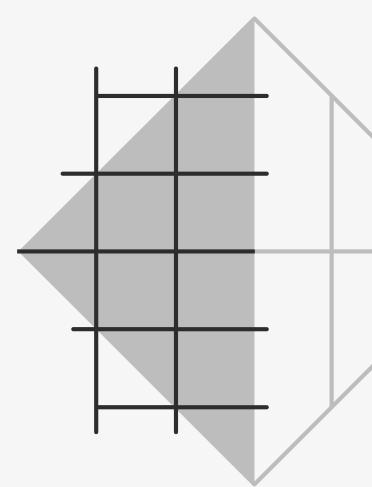

3. Tell a Story

Fight the temptation to talk about your "patent-pending, curvejumping, paradigm-shifting, enterprise-class, scalable product or service," Kawasaki says. You'll sound just like every other company the VC is meeting that day. CEO after CEO will try to "throw everything in there because you want to use shock and awe to convince these investors to write you a check at the end of 60 minutes. Wake up — that's not how it works. What you want to do is tell stories about why you created the company."

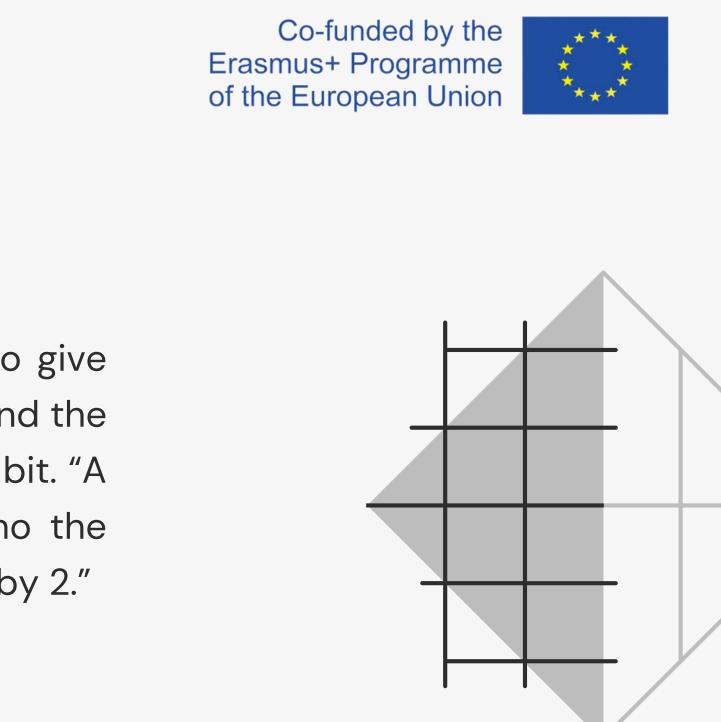

4. Observe the 10/20/30 Rule

The optimal number of slides is 10. You should be able to give your whole talk in 20 minutes (even if you have an hour). And the ideal font size is 30 points — though you can fudge that a bit. "A very good calculation for your font size is figure out who the oldest person is in the audience, then divide his or her age by 2."

Project Number. 2020–3–EL02–KA205–006663

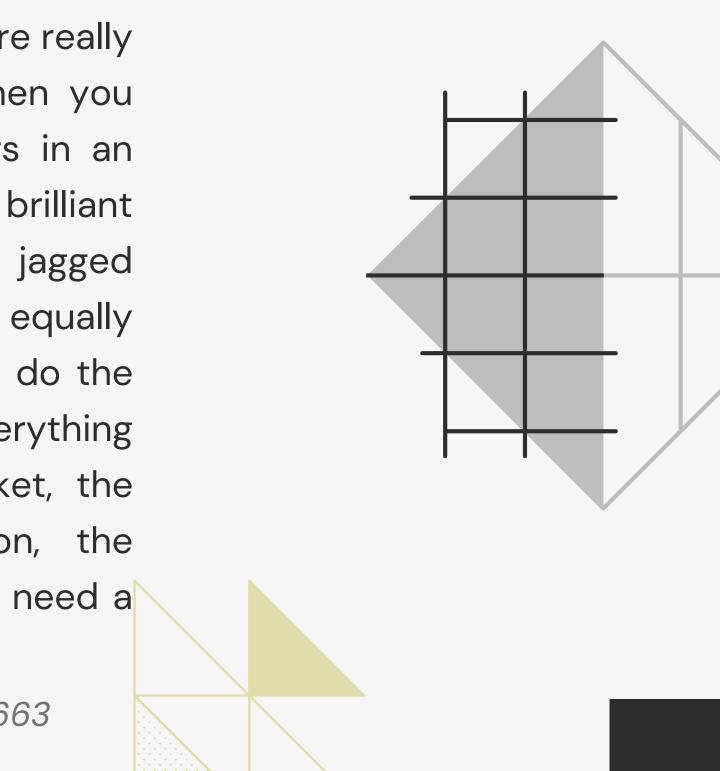

5. Let One Person Do the Talking

You know that standard nugget of advice that investors are really investing in your team? It's a trap, says Kawasaki. When you parade your CEO, CTO, and CMO in front of investors in an attempt to show off how dedicated, hardworking, and brilliant you all are, you really just end up with an unstable, jagged presentation. "Somebody's going to blow it. You're not all equally rehearsed. You're not all equally good. Just let the CEO do the talking," Kawasaki says. "If your CEO cannot present everything about the 10 slides you're going to see — the market, the technology, the marketing, the product introduction, the financials — if your CEO cannot cover those topics, you need a new CEO.

Project Number. 2020-3-EL02-KA205-006663

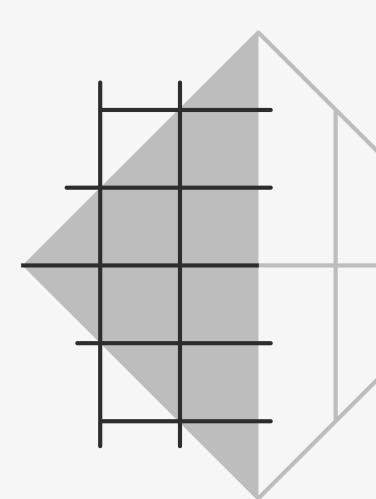

6. Get to 1,000 Feet and Stay There

To calibrate the right level of detail in your talk, Kawasaki advises you keep a military analogy in mind. Don't be a B-1 bomber flying at 50,000 feet with banalities like "Security is a concern for large companies" or "Millennials want to communicate socially." On the other hand, don't be a Navy SEAL crawling through the mud explaining the ins and outs of your relational database. You want to be an A-10 Warthog, says Kawasaki, "the plane that flies 1,000 to 5,000 feet and supports the ground troops. This is not the plane that is way up; it's also not the person on the ground with a knife in his or her teeth.

Project Number. 2020-3-EL02-KA205-006663

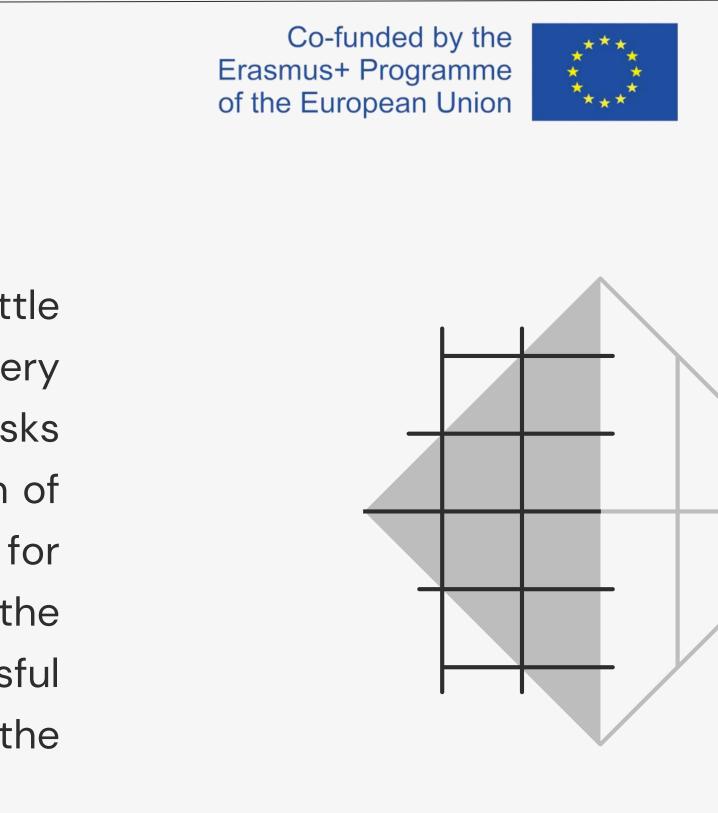

7. Answer the Little Man

"Pretend that for everything you say there is a little man or woman on your shoulder," Kawasaki says. "Every time you say something, the little man or woman asks the question, 'So what?'" If you say you have a team of people who worked at SAP, HP, Google, and Cisco, for example, don't assume the audience will make the intuitive leap that your team is full of proven, successful people. "You have to answer the little man for the audience."

Project Number. 2020-3-EL02-KA205-006663

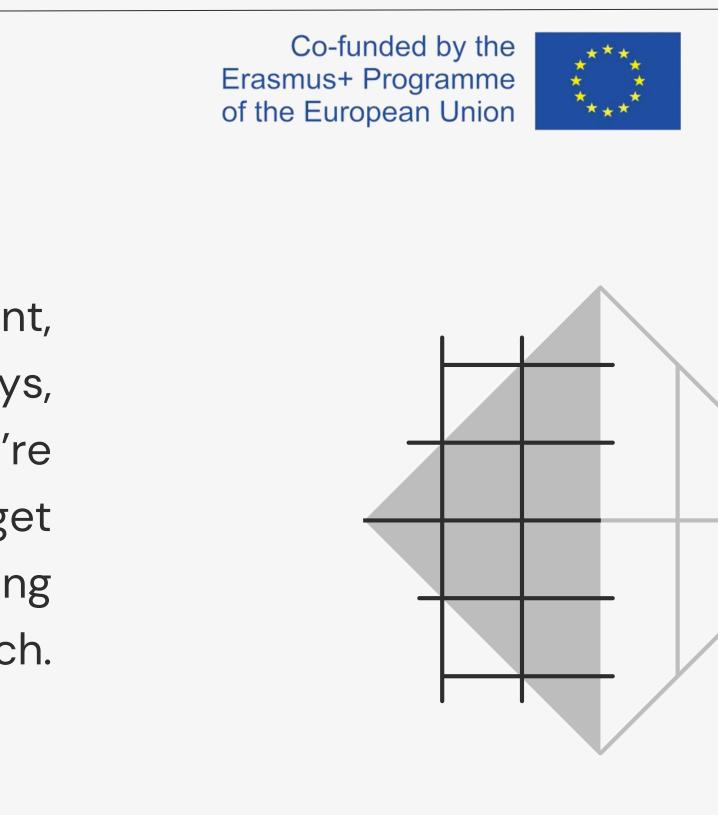

8. Pitch Constantly

Pitching is an acquired skill, not an innate talent, Kawasaki says. It takes practice. And yet, he says, the tendency of CEOs is to assume they're somehow the exception to that rule and can get up and just wing it. "It takes about 25 times giving the pitch until you're really smooth with the pitch. This means you have to pitch all the time."

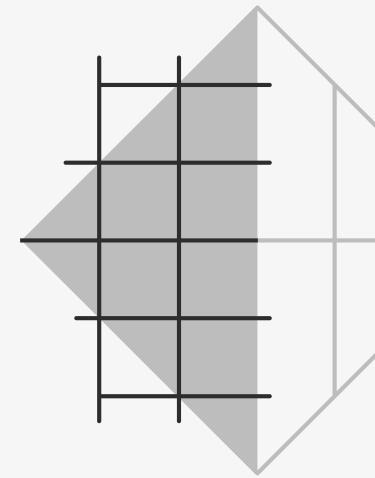

9. Shut Up, Take Notes, and Follow Up

When you've gotten to the end of your presentation and you're fielding questions, take notes. "Or at least fake notes," Kawasaki says. "Because what that taking communicates is that you're taking me seriously. If I see you taking notes when I talk, my conclusion is what? You're smart. If I don't see you taking notes, my only conclusion is not that I'm not smart. It's that you're not smart. You're so freaking stupid you don't even take notes when I'm giving you all this wisdom."

Project Number. 2020–3–EL02–KA205–006663

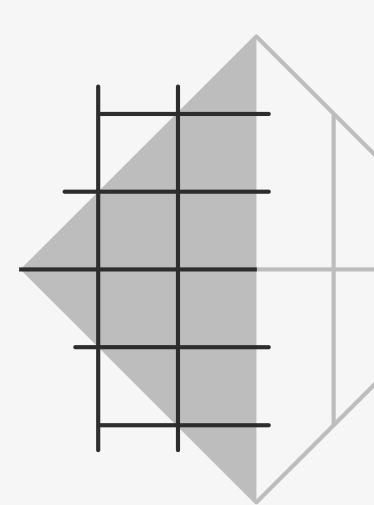

10. Start from Scratch

Your pitch is a constant work in progress — which is both good and bad. After meeting with a VC who's concerned about the team, you add a team page. The next one is interested in the technology, so you add a bit about the optimal programming language. And then someone wants to know about the marketing plan, so you add a marketing slide. Pretty soon your talk is the equivalent of a jeepney, Kawasaki says, referencing the postwar Jeep hybrids common in the Philippines. "They take fenders from a Mercedes, an engine from a Chevrolet. And it's quite beautiful, actually, but at this point a jeepney bears no relationship to the World War II Jeep that the Americans left," Kawasaki says.

Key Partners

Identify your company's key partners. This can consist of important suppliers in your supply chain. What key resources does the company receive from these partners? What key activities are performed by these partners? Think about why your company works with these key partners and the motivations behind them.

Key Activities

What specific key activities are necessary to deliver your value proposition? What activities set your company apart from others? Consider how your company's unique differences in its revenue streams, distribution channels, or customer relationships. Do you need to procure specific niche resources? Do you need to streamline to keep costs and prices low?

Key Resources

What specific key resources or assets are necessary to deliver your value proposition? Consider what resources your distribution channels and revenue streams may require to function. Additionally, think about what resources are needed to maintain customer relationships. Does your company require a lot of capital or human resources?

Value Propositions

Identify the core value the company provides to customers. What exactly is the company trying to give to customers? What problem is your company trying to solve and what needs are your company satisfying? How do you offer something different that satisfies the demands of your customer segments (e.g. price, quality, design, status)?

Cost Structure

Identify the key costs in your company's business model. What are the major drivers of costs? How do your key activities and key resources contribute to the cost structure? How do your costs relate to your revenue streams? Are you properly utilizing economies of scale? What proportion of costs are fixed and variable? Is your company focused on cost optimization or value?

Revenue Streams

Identify the ways your value proposition generates money for your business. Does your company have multiple methods of generating revenue? What is the pricing strategy for the products offered by your company? Through what channels do your customers pay? Does your company offer multiple forms of payment?

Customer Relationships

What type of relationship doyou have with your customers? How do you interact with customers and how does this differ amongst customer segments? Do you communicate frequently with your customers? How much support does your company provide?

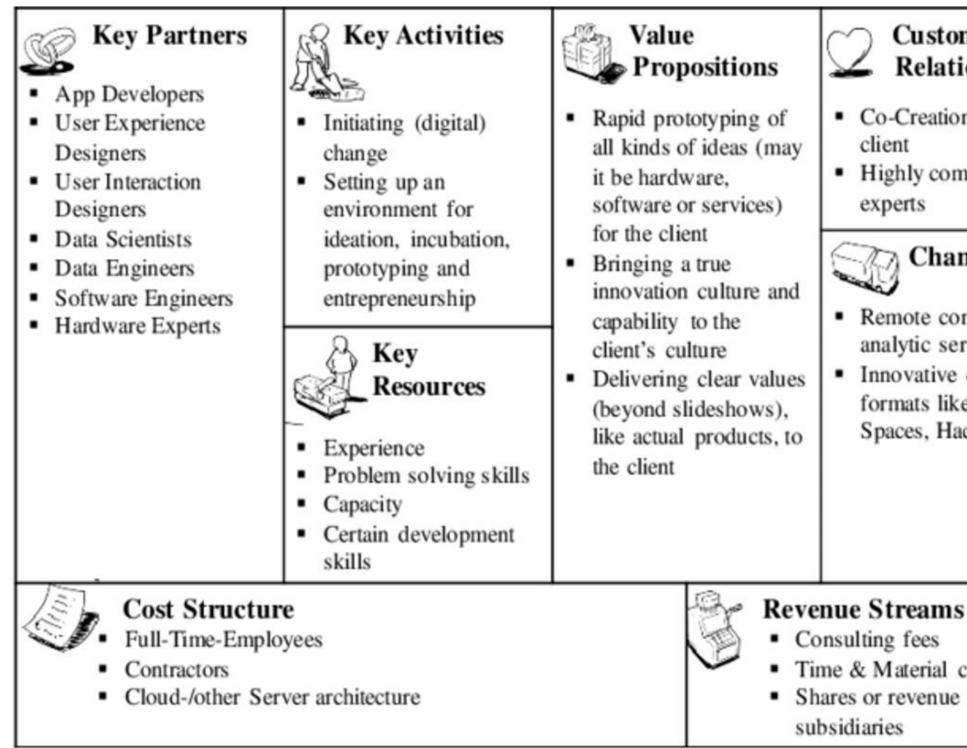

How do you deliver your value proposition? How do you reach your customer segments? What channels are used? Consider your supply, distribution, marketing, and communication channels. Are they well-integrated and cost

Identify who is your value proposition targets. Who are you creating value for? Who are your most important customers? What are they like? What do they need? What do they enjoy? What is the customer market like? Are you targeting a small niche community or a mass market?

Youth Pass

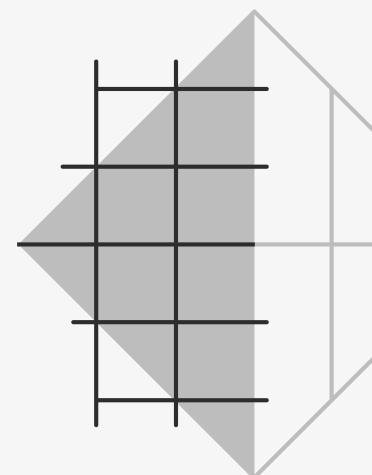

(413) Let's talk about Youthpass – YouTube

The framework of the Key Competences for Lifelong Learning has been revised in May 2018. For the Erasmus+, the new framework appears on all the projects that have been entered into Youthpass database on August 20 or later. The change does not affect the Erasmus+ projects that have been entered into the Youthpass database before that date, even if the certificates are generated anew later on. The new Key Competences also appear on all Youthpass certificates of the European Solidarity Corps programme. The revised Key Competences are:

- Multilingual competence.
- Personal, social and learning to learn competence.
- Citizenship competence.
- Entrepreneurship competence.
- Cultural awareness and expression competence.
- Digital competence.
- Mathematical competence and competence in science, technology and engineering.
- Literacy competence.
